

Summary Tables for FY 2015 Northeast Multispecies Fishery

These summary tables were produced by NOAA Fisheries Service's Greater Atlantic Regional Fisheries Office. The summary tables compare data for the full twelve months of the Northeast Multispecies fishing year (May-April) for fishing years 2007 through 2015. These tables, as well as additional data and analysis, will be presented in the 2015 Final Report on the Performance of the Northeast Multispecies (Groundfish) Fishery (May 2015 - April 2016), to be produced and released by NOAA's Northeast Fisheries Science Center's Social Science Branch in Spring 2018. The FY2015 Final Report may be viewed on the NEFSC's Social Sciences Branch homepage.

Note throughout this report "Trips" refer to commercial trips sailing under a federal limited access groundfish permit. Landings are in landed weight unless otherwise specified. Groundfish trips include estimates of missing dealer report data.

Unless otherwise indicated this report is based on active vessels, which are vessels that received revenue from any species on any trip while fishing under a federal limited access groundfish permit.

Note that in tables with vessel counts, sector and common pool counts or home state counts may exceed the total vessel count because vessels may switch between sector and common pool eligibilities or home ports during the fishing year.

Data may be grouped or display "NA" due to data confidentiality.

These data are the best available to NOAA's National Marine Fisheries Service (NMFS). Data sources for this report include: (1) Vessels via VMS; (2) Vessels via vessel logbook reports; (3) Dealers via Dealer Electronic reporting. Differences with previous reports are due to corrections made to the database.

Over time the number of vessels will differ from the number of eligibilites because these eligibilities can be transferred from vessel to vessel during the fishing year.

These vessel counts exclude groundfish limited access eligibilities held as CPH. Starting in 2010, Amendment 16 authorized CPH holders to join sectors and to lease DAS. For purposes of comparison, CPH vessels are not included in the data for either sector or common pool.

For example, in Table 34, by adding the all species revenues presented for the "Top 1%" and "Top 20%" categories in 2010, one can obtain the total all species revenues earned by the top 20% of vessels (\$190,304,241), \$18,838,589 of which was earned by the top 1% of vessels.

* In Table 35, each category presents the incremental difference in cumulative groundfish revenue from the previous category. For example, in Table 35, by adding the groundfish revenues presented for the "Top 1%" and "Top 20%" categories in 2010, one can obtain the total groundfish revenues earned by the top 20% of vessels (\$63,232,594), \$8,368,444 of which was earned by the top 1% of vessels.
